Solid Waste Management

All of the solid trash generated by the dorm and college is separated at the source and disposed of correctly. Every floor of the campus, including the hostels and canteen, has a trash can for biodegradable garbage that is green, blue, or yellow, and a dustbin for non-biodegradable waste that is red.

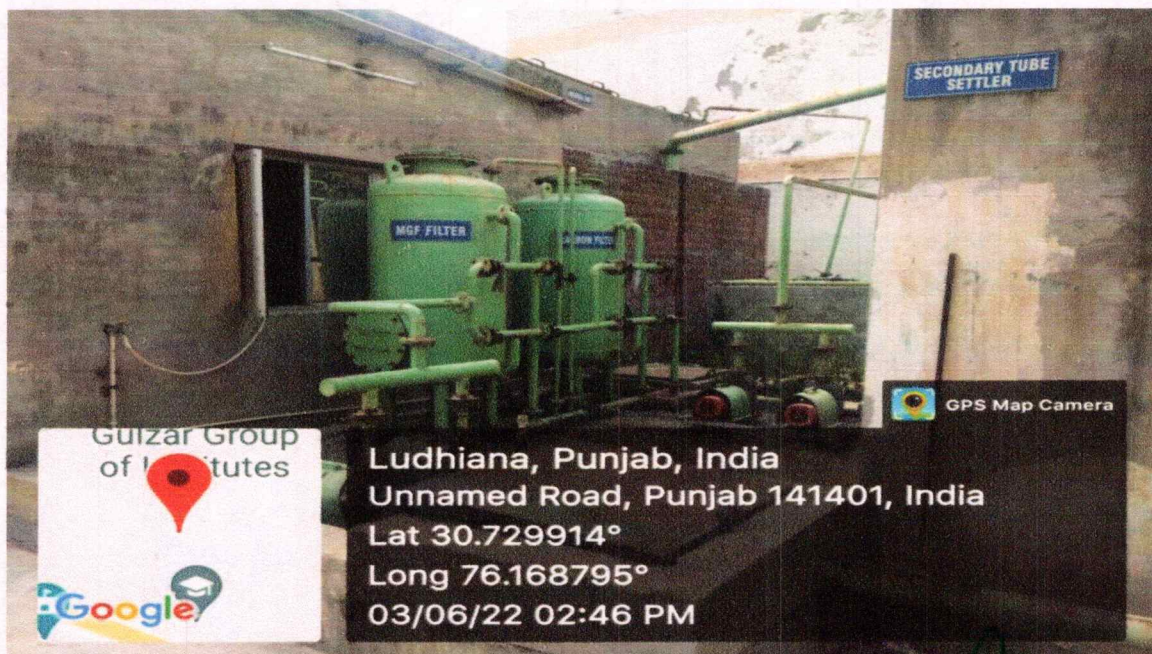

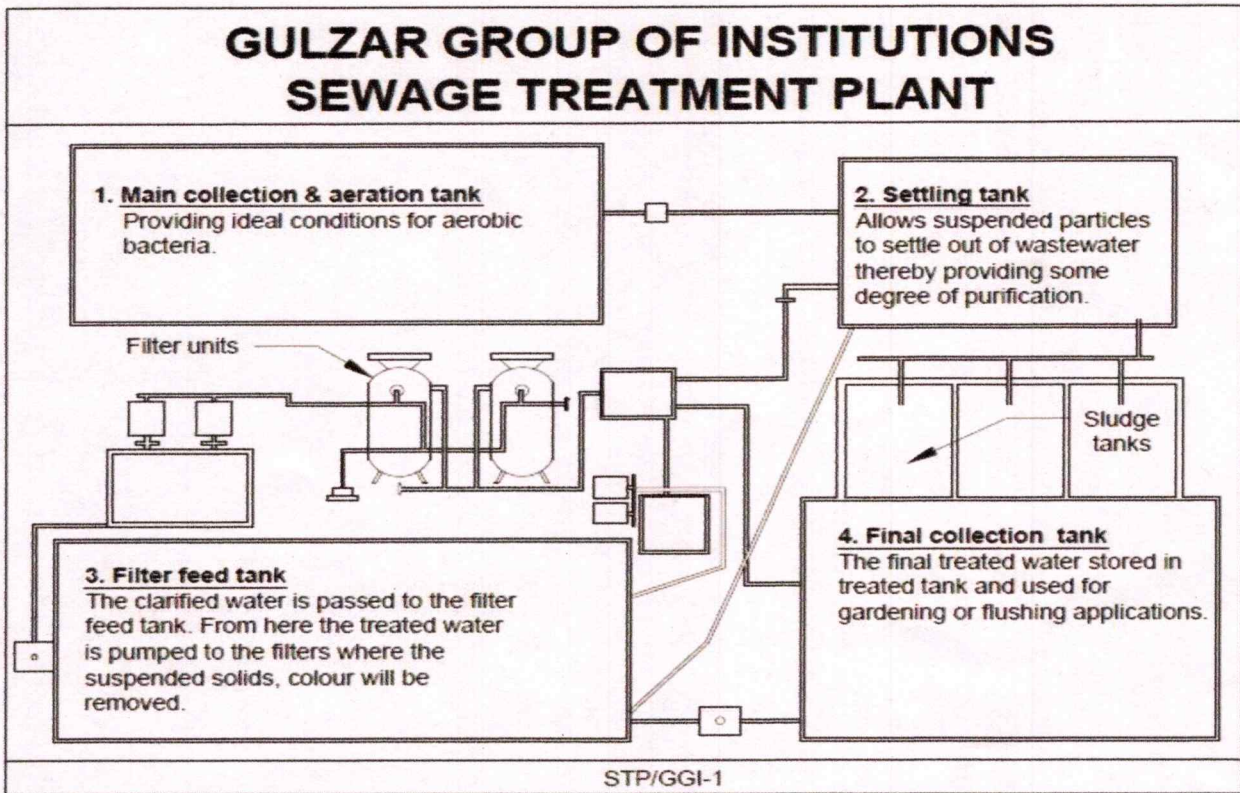

Biodegradable and Non Biodegradable Waste Bin

Liquid Waste Management

The campus contains a sewage treatment plant (STP) with a daily capacity of 100,000 litres that cleans wastewater of pollutants.

E- Waste Management

The Institute follows an organic process for choosing and gathering all unusable electronic waste, including computers, printers, cables, floppies, CDs, mice, keyboards, and other IT equipment. These items are then placed in the proper location before being turned over to the agency.

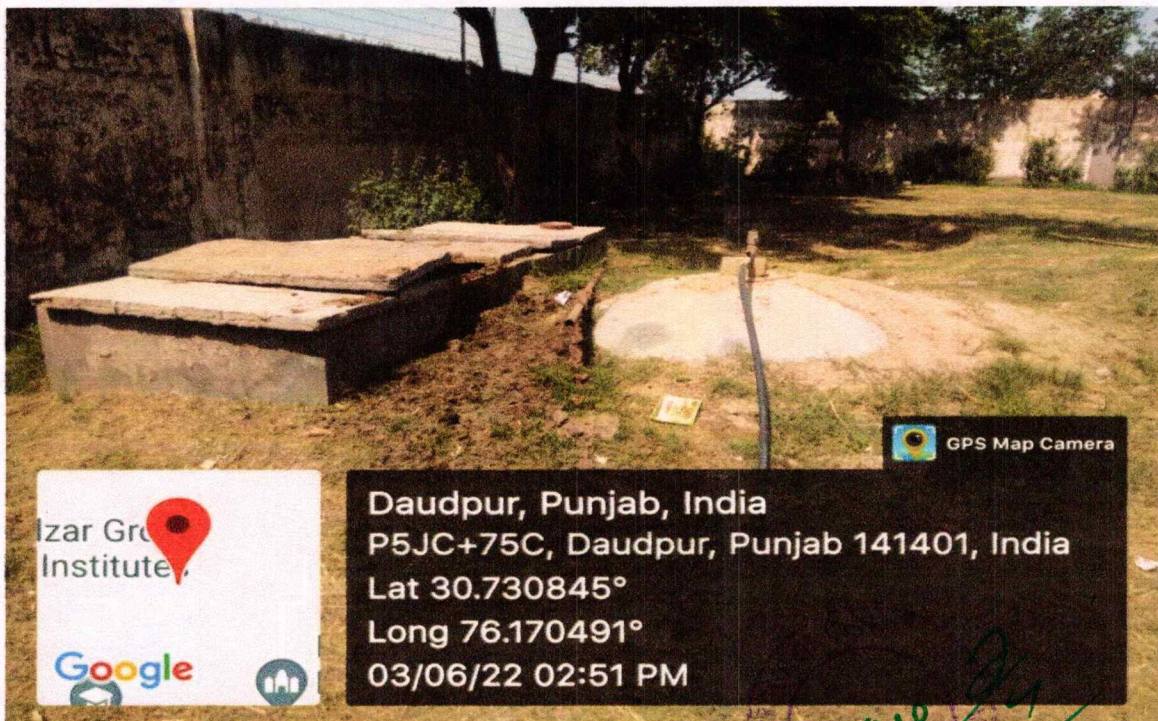

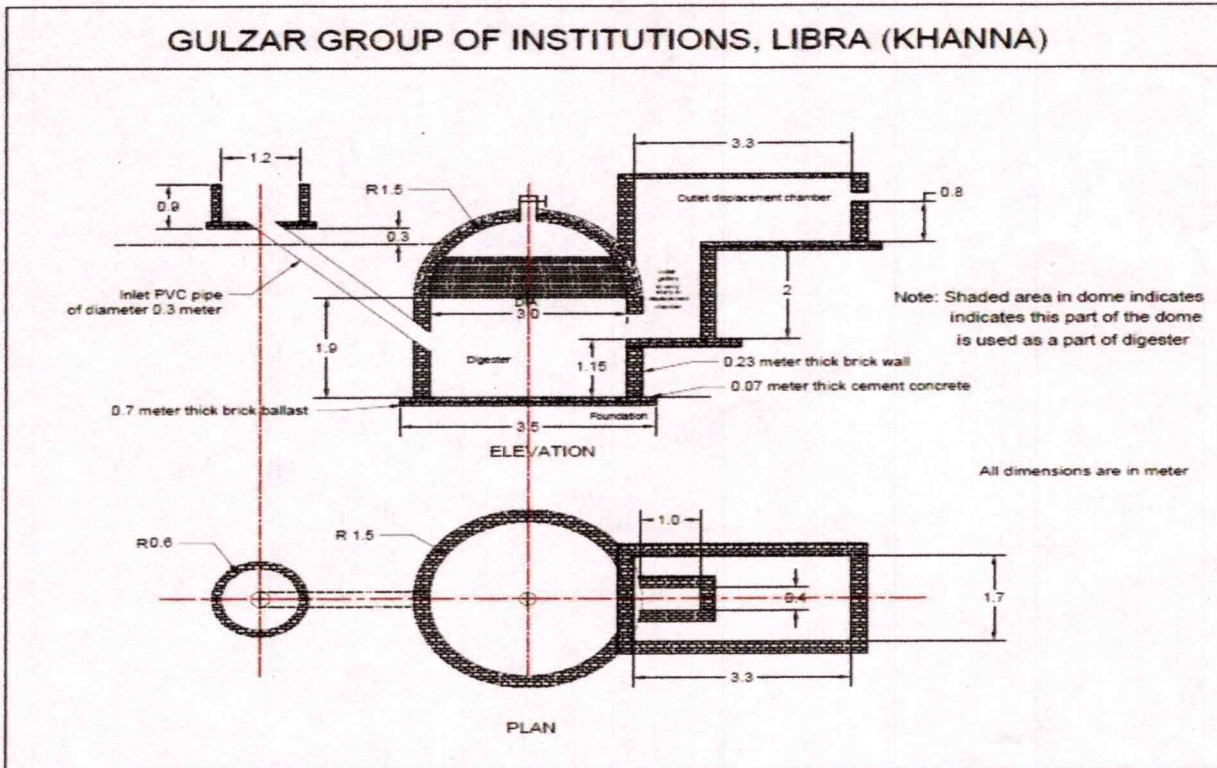

E- Waste Storage

Waste Recycling System

The institute put up odor-free bio-composters that followed the vermin culture on the campus, as well as a bio gas plant, carefully according to the rules.
